

Course Schedule

Human Anatomy · Summer 2026

8-week summer intensive, in-person, Team-Based Learning. Meets Monday through Thursday.

SAMPLE DATA, replace dates and topics with your real course

Graded Items and Due Dates

Due Date	Item	Type	Points
Mon, Jun 15	Readiness Assurance 1 (iRAT + tRAT)	Readiness Assurance	15
Wed, Jun 17	Application Activity: Tissue ID Challenge	Application Activity	15
Mon, Jun 22	Readiness Assurance 2 (iRAT + tRAT)	Readiness Assurance	15
Wed, Jun 24	Application Activity: Axial Skeleton Build	Application Activity	15
Thu, Jun 25	Lab Exam 1	Lab Practical Exam	80
Mon, Jun 29	Readiness Assurance 3 (iRAT + tRAT)	Readiness Assurance	15
Wed, Jul 1	Application Activity: Joint Classification	Application Activity	15
Thu, Jul 2	Lab Exam 2	Lab Practical Exam	80
Mon, Jul 6	Readiness Assurance 4 (iRAT + tRAT)	Readiness Assurance	15
Wed, Jul 8	Application Activity: Limb Muscle Map	Application Activity	15
Thu, Jul 9	Midterm Exam	Midterm Exam	160
Mon, Jul 13	Readiness Assurance 5 (iRAT + tRAT)	Readiness Assurance	15
Wed, Jul 15	Application Activity: Brain Atlas Build	Application Activity	15
Thu, Jul 16	Lab Exam 3	Lab Practical Exam	80
Mon, Jul 20	Readiness Assurance 6 (iRAT + tRAT)	Readiness Assurance	15
Wed, Jul 22	Application Activity: Endocrine Gland Locator	Application Activity	15
Thu, Jul 23	Lab Exam 4	Lab Practical Exam	80
Mon, Jul 27	Readiness Assurance 7 (iRAT + tRAT)	Readiness Assurance	15
Wed, Jul 29	Application Activity: Circulatory and Airway Trace	Application Activity	15
Thu, Jul 30	Lab Exam 5	Lab Practical Exam	80
Mon, Aug 3	Readiness Assurance 8 (iRAT + tRAT)	Readiness Assurance	15
Wed, Aug 5	Application Activity: Viscera Synthesis	Application Activity	15

Due Date	Item	Type	Points
Thu, Aug 6	Final Exam	Final Exam	200
Course total			1000

Week 1: Foundations and Histology

Jun 15 to 18

Monday · Mon, Jun 15

Orientation and Anatomical Terminology

Anatomical position, body planes, directional terms, body cavities, regional terms.

In class: Course orientation; Team formation; Mini-lecture: the language of anatomy; Readiness Assurance 1 (iRAT + tRAT)

DUE Mon, Jun 15 Readiness Assurance: Readiness Assurance 1 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Read the syllabus and mark all 5 lab exam dates, the midterm, and the final in your planner.
- Make flashcards for the directional terms: superior, inferior, medial, lateral, proximal, distal, anterior, posterior, superficial, deep.
- Draw the body in anatomical position and label the three planes from memory.

Tuesday · Tue, Jun 16

Epithelial Tissue

Classification of epithelia by shape and layers, glandular epithelium.

In class: Histology lab: epithelial slides; Team microscopy stations

Recommended tonight, not graded:

- Pre-read the connective tissue section before tomorrow.
- Build a table of epithelial types: shape, layers, and one location each.
- Sketch simple squamous, stratified squamous, and pseudostratified epithelium from memory.

Wednesday · Wed, Jun 17

Connective Tissue

Connective tissue proper, cartilage, bone, and blood as connective tissue.

In class: Histology lab: connective tissue identification; Application Activity: Tissue ID Challenge

DUE Wed, Jun 17 Application Activity: Application Activity: Tissue ID Challenge (15 pts)

Recommended tonight, not graded:

- Quiz yourself: name the connective tissue found in 8 locations without looking.
- Draw a labeled diagram of the four primary tissue types covered so far.
- Pre-read the integumentary chapter, focus on the epidermal layers.

Thursday · Thu, Jun 18

Integumentary System

Epidermal layers, dermis, accessory structures, surface markings.

In class: Integumentary models; Skin-layer drawing workshop

Recommended tonight, not graded:

- Draw a cross-section of skin from memory: label all epidermal layers, the dermis, and 3 accessory structures.
- Build flashcards for the skin accessory structures: hair follicle, sebaceous gland, sweat gland, nail.
- Preview Week 2: skim the bone tissue section.

Week 2: Skeletal System I: Bone and the Axial Skeleton

Jun 22 to 25

Monday · Mon, Jun 22

Bone Tissue and Bone Classification

Compact vs spongy bone, bone shapes, structure of a long bone, bone markings.

In class: Readiness Assurance 2 (iRAT + tRAT); Bone model stations

DUE Mon, Jun 22 Readiness Assurance: Readiness Assurance 2 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Draw a long bone in longitudinal section and label the diaphysis, epiphysis, and 6 internal structures.
- Make flashcards for the bone markings: process, condyle, foramen, fossa, tubercle, trochanter.
- Self-quiz: compact vs spongy bone and where each is found.

Tuesday · Tue, Jun 23

Axial Skeleton: The Skull

Cranial and facial bones, sutures, major foramina, the bony orbit.

In class: Skull station rotation; Team identification drill

Recommended tonight, not graded:

- Label a blank skull diagram (lateral and anterior views) from memory.
- Make flashcards for the 8 cranial and 14 facial bones.
- List the bones that form the orbit and the nasal septum.

Wednesday · Wed, Jun 24

Axial Skeleton: Vertebral Column and Thorax

Vertebral regions, intervertebral structure, ribs, sternum, spinal curvatures.

In class: Application Activity: Axial Skeleton Build

DUE Wed, Jun 24 Application Activity: Application Activity: Axial Skeleton Build (15 pts)

Recommended tonight, not graded:

- Draw the vertebral column and label all five regions and both curvatures.
- Compare a cervical, thoracic, and lumbar vertebra in a 3-column table.
- Begin Lab Exam 1 review: re-walk every station topic from Weeks 1 and 2.

Thursday · Thu, Jun 25

Lab Exam 1

Practical exam: foundations, histology, integumentary, axial skeleton.

In class: Lab Practical Exam 1

DUE Thu, Jun 25 Lab Practical Exam: Lab Exam 1 (80 pts)

Recommended tonight, not graded:

- Light night: review your Lab Exam 1 feedback once it posts.
- Pre-read the upper limb section for tomorrow.
- Reset your flashcard deck and retire the cards you have mastered.

Week 3: Skeletal System II: Appendicular Skeleton and Joints

Jun 29 to Jul 2

Monday · Mon, Jun 29

Appendicular Skeleton: Upper Limb

Pectoral girdle, humerus, radius, ulna, carpals, metacarpals, phalanges.

In class: Readiness Assurance 3 (iRAT + tRAT); Upper limb stations

DUE Mon, Jun 29 Readiness Assurance: Readiness Assurance 3 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Label the bones of the upper limb and pectoral girdle from memory.
- Make flashcards for the bony landmarks of the humerus, radius, and ulna.
- Sketch the carpal bones in two rows and name each one.

Tuesday · Tue, Jun 30

Appendicular Skeleton: Lower Limb

Pelvic girdle, femur, patella, tibia, fibula, tarsals, metatarsals, phalanges.

In class: Lower limb stations; Team identification drill

Recommended tonight, not graded:

- Label the bones of the lower limb and pelvic girdle from memory.
- Compare the male and female pelvis in a quick labeled sketch.
- Self-quiz: the tarsal bones and the arches of the foot.

Wednesday · Wed, Jul 1

Articulations (Joints)

Structural and functional joint classes, synovial joint anatomy, joint movements.

In class: Application Activity: Joint Classification

DUE Wed, Jul 1 Application Activity: Application Activity: Joint Classification (15 pts)

Recommended tonight, not graded:

- Build a table of synovial joint types with one example and its movements for each.
- Draw a synovial joint in cross-section and label 5 structures.
- Lab Exam 2 review: re-walk every upper limb, lower limb, and joint station.

Thursday · Thu, Jul 2

Lab Exam 2

Practical exam: appendicular skeleton and joints.

In class: Lab Practical Exam 2

DUE Thu, Jul 2 Lab Practical Exam: Lab Exam 2 (80 pts)

Recommended tonight, not graded:

- Light night: review your Lab Exam 2 feedback once it posts.
- Pre-read the skeletal muscle organization section.
- Update your flashcard deck before the muscular unit begins.

Week 4: Muscular System and Midterm

Jul 6 to 9

Monday · Mon, Jul 6

Skeletal Muscle Organization and Naming

Gross muscle structure, fascicle arrangement, muscle naming criteria, action vocabulary.

In class: Readiness Assurance 4 (iRAT + tRAT); Muscle naming workshop

DUE Mon, Jul 6 Readiness Assurance: Readiness Assurance 4 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Draw skeletal muscle from gross structure down to the fascicle and label each connective tissue layer.
- Make flashcards for the muscle naming criteria with one example muscle each.
- Self-quiz the action vocabulary: flexion, extension, abduction, adduction, rotation, circumduction.

Tuesday · Tue, Jul 7

Muscles of the Head, Neck, and Trunk

Facial expression, mastication, neck, abdominal wall, and deep back muscles.

In class: Muscle identification stations

Recommended tonight, not graded:

- Label the muscles of facial expression and mastication from memory.
- Sketch the abdominal wall layers and name each muscle.
- Make flashcards for the origin region and action of 10 trunk muscles.

Wednesday · Wed, Jul 8

Muscles of the Limbs

Upper and lower limb muscle groups and compartments.

In class: Application Activity: Limb Muscle Map

DUE Wed, Jul 8 Application Activity: Application Activity: Limb Muscle Map (15 pts)

Recommended tonight, not graded:

- Map the muscle compartments of the arm and leg in a labeled diagram.
- Midterm review: build a one-page concept map of Weeks 1 to 4.
- Re-test yourself on every flashcard deck from Weeks 1 to 4.

Thursday · Thu, Jul 9

Midterm Exam

Comprehensive lecture and lab exam covering Weeks 1 to 4.

In class: Midterm Exam

DUE Thu, Jul 9 Midterm Exam: Midterm Exam (160 pts)

Recommended tonight, not graded:

- Light night: rest, and review your midterm feedback once it posts.
- Pre-read the nervous tissue section.
- Note any topics from the midterm that you want to revisit.

Week 5: Nervous System I: Tissue and Central Nervous System

Jul 13 to 16

Monday · Mon, Jul 13

Nervous Tissue

Neuron structure, neuroglia of the CNS and PNS, gray vs white matter.

In class: Readiness Assurance 5 (iRAT + tRAT); Histology of nervous tissue

DUE Mon, Jul 13 Readiness Assurance: Readiness Assurance 5 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Draw a multipolar neuron and label every structure plus the direction of signal travel.
- Make flashcards for the neuroglia of the CNS and the PNS.
- Self-quiz: gray matter vs white matter, location and composition.

Tuesday · Tue, Jul 14

Spinal Cord and Spinal Nerves

Spinal cord cross-section, meninges, spinal nerves, plexuses, reflex arc anatomy.

In class: Spinal cord models; Plexus tracing stations

Recommended tonight, not graded:

- Draw a spinal cord cross-section and label the horns, columns, roots, and meninges.
- Map the four major nerve plexuses and name one nerve from each.
- Make flashcards for the components of a reflex arc.

Wednesday · Wed, Jul 15

The Brain

Cerebrum, diencephalon, brainstem, cerebellum, ventricular system.

In class: Application Activity: Brain Atlas Build

DUE Wed, Jul 15 Application Activity: Application Activity: Brain Atlas Build (15 pts)

Recommended tonight, not graded:

- Label a midsagittal brain diagram from memory.
- Make flashcards for the four ventricles and the lobes of the cerebrum.
- Lab Exam 3 review: re-walk the muscular and nervous tissue / CNS stations.

Thursday · Thu, Jul 16

Lab Exam 3

Practical exam: muscular system, nervous tissue, and the central nervous system.

In class: Lab Practical Exam 3

DUE Thu, Jul 16 Lab Practical Exam: Lab Exam 3 (80 pts)

Recommended tonight, not graded:

- Light night: review your Lab Exam 3 feedback once it posts.
- Pre-read the cranial nerves section.
- Refresh your flashcard deck before the special senses unit.

Week 6: Nervous System II: Peripheral Pathways and Special Senses

Jul 20 to 23

Monday · Mon, Jul 20

Cranial Nerves and the Autonomic Nervous System

The 12 cranial nerves; structural pathways of the sympathetic and parasympathetic divisions.

In class: Readiness Assurance 6 (iRAT + tRAT); Cranial nerve stations

DUE Mon, Jul 20 Readiness Assurance: Readiness Assurance 6 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Make flashcards for all 12 cranial nerves: name, number, and sensory / motor / both.
- Draw the sympathetic and parasympathetic pathways structurally.
- Use a mnemonic to lock in cranial nerve order, then test yourself on a blank list.

Tuesday · Tue, Jul 21

Special Senses: Eye and Ear

Gross and internal anatomy of the eye and the ear.

In class: Eye and ear models; Dissection demonstration

Recommended tonight, not graded:

- Label the eye and the ear in cross-section from memory.
- Make flashcards for the structures light passes through and the structures sound passes through.
- List the accessory structures of the eye.

Wednesday · Wed, Jul 22

Endocrine Glands (Anatomy)

Location and gross anatomy of the major endocrine glands.

In class: Application Activity: Endocrine Gland Locator

DUE Wed, Jul 22 Application Activity: Application Activity: Endocrine Gland Locator (15 pts)

Recommended tonight, not graded:

- Draw a body outline and place every endocrine gland in its correct location.
- Make flashcards for the gross appearance and location of 8 endocrine glands.
- Lab Exam 4 review: re-walk the brain, cranial nerve, senses, and endocrine stations.

Thursday · Thu, Jul 23

Lab Exam 4

Practical exam: brain, cranial nerves, special senses, and endocrine glands.

In class: Lab Practical Exam 4

DUE Thu, Jul 23 Lab Practical Exam: Lab Exam 4 (80 pts)

Recommended tonight, not graded:

- Light night: review your Lab Exam 4 feedback once it posts.
- Pre-read the heart anatomy section.
- Reset your flashcard deck for the cardiovascular unit.

Week 7: Cardiovascular, Lymphatic, and Respiratory Systems

Jul 27 to 30

Monday · Mon, Jul 27

The Heart

Chambers, valves, great vessels, and coronary circulation anatomy.

In class: Readiness Assurance 7 (iRAT + tRAT); Heart models and dissection

DUE Mon, Jul 27 Readiness Assurance: Readiness Assurance 7 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Draw the heart and label all four chambers, all four valves, and the great vessels.
- Trace a drop of blood through the heart and label the coronary vessels.
- Make flashcards for the heart valves and what each one separates.

Tuesday · Tue, Jul 28

Blood Vessels

Major arteries and veins, structure of the three vessel wall types.

In class: Vascular pathway stations

Recommended tonight, not graded:

- Label the major arteries and veins on a body outline from memory.
- Compare the three vessel wall layers in a quick table.
- Trace blood from the heart to the hand and back.

Wednesday · Wed, Jul 29

Lymphatic and Respiratory Systems

Lymphatic vessels and organs; respiratory tract anatomy.

In class: Application Activity: Circulatory and Airway Trace

DUE Wed, Jul 29 Application Activity: Application Activity: Circulatory and Airway Trace (15 pts)

Recommended tonight, not graded:

- Draw the respiratory tract from nose to alveolus and label each structure.
- Map the lymphatic organs on a body outline.
- Lab Exam 5 review: re-walk the heart, vessel, lymphatic, and respiratory stations.

Thursday · Thu, Jul 30

Lab Exam 5

Practical exam: cardiovascular, lymphatic, and respiratory systems.

In class: Lab Practical Exam 5

DUE Thu, Jul 30 Lab Practical Exam: Lab Exam 5 (80 pts)

Recommended tonight, not graded:

- Light night: review your Lab Exam 5 feedback once it posts.
- Pre-read the digestive system section.
- Begin a cumulative review list for the final exam.

Week 8: Viscera and Synthesis

Aug 3 to 6

Monday · Mon, Aug 3

Digestive System

Gastrointestinal tract and accessory digestive organs anatomy.

In class: Readiness Assurance 8 (iRAT + tRAT); Digestive system models

DUE Mon, Aug 3 Readiness Assurance: Readiness Assurance 8 (iRAT + tRAT) (15 pts)

Recommended tonight, not graded:

- Draw the digestive tract and label the accessory organs.
- Make flashcards for the layers of the GI tract wall and the accessory organs.
- Add this week's topics to your final exam review list.

Tuesday · Tue, Aug 4

Urinary System

Kidney gross and internal anatomy, ureters, bladder, urethra.

In class: Kidney dissection

Recommended tonight, not graded:

- Draw a kidney in frontal section and label the internal anatomy.
- Trace the path of urine from the glomerulus to the urethra.
- Final review: rebuild your concept map for Weeks 5 to 7.

Wednesday · Wed, Aug 5

Reproductive Systems

Male and female reproductive system anatomy.

In class: Application Activity: Viscera Synthesis

DUE Wed, Aug 5 Application Activity: Application Activity: Viscera Synthesis (15 pts)

Recommended tonight, not graded:

- Label the male and female reproductive systems from memory.
- Final review: re-test every flashcard deck and retire what you have mastered.
- Walk every lab station topic from the whole course one more time.

Thursday · Thu, Aug 6

Final Exam

Comprehensive lecture and lab exam covering the entire course.

In class: Comprehensive Final Exam

DUE Thu, Aug 6 Final Exam: Final Exam (200 pts)

Recommended tonight, not graded:

- You made it. Rest well before the final.
- Light review only: skim your concept maps, do not cram.
- Bring your student ID and arrive early.
